Assignment 18

Components in AEM using CRX

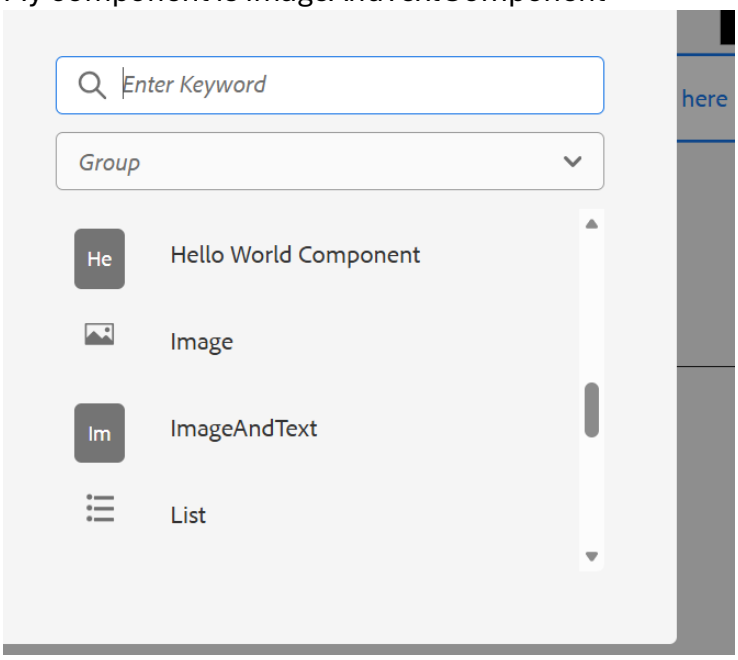
Problem Statement

Create a custom AEM component featuring two input fields: one for text and one for an image. The component should render the text overlaid on the image. You may use inline CSS for this implementation.

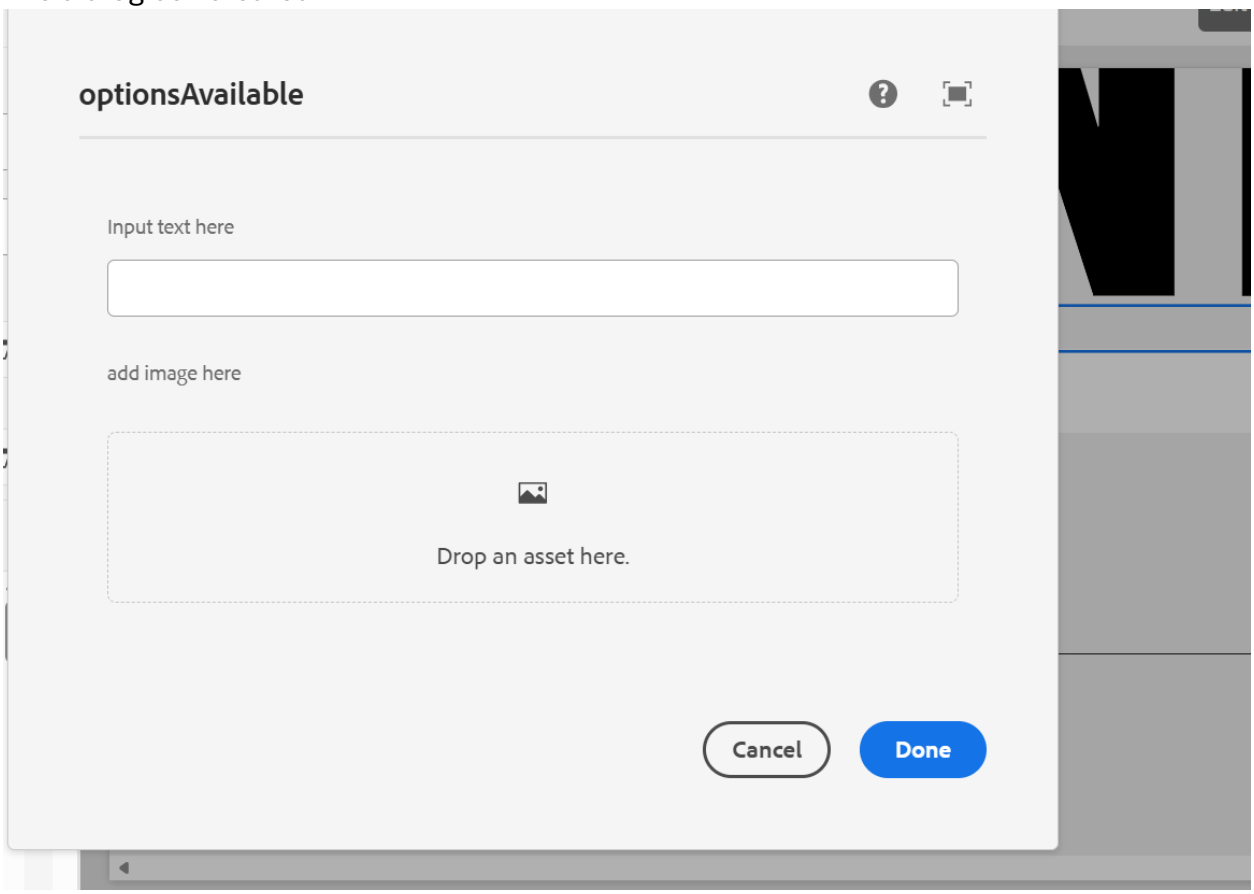
Output

Submitted to Shivam Thakur 06-02-2025

My component is imageAndTextComponent



The dialog box created

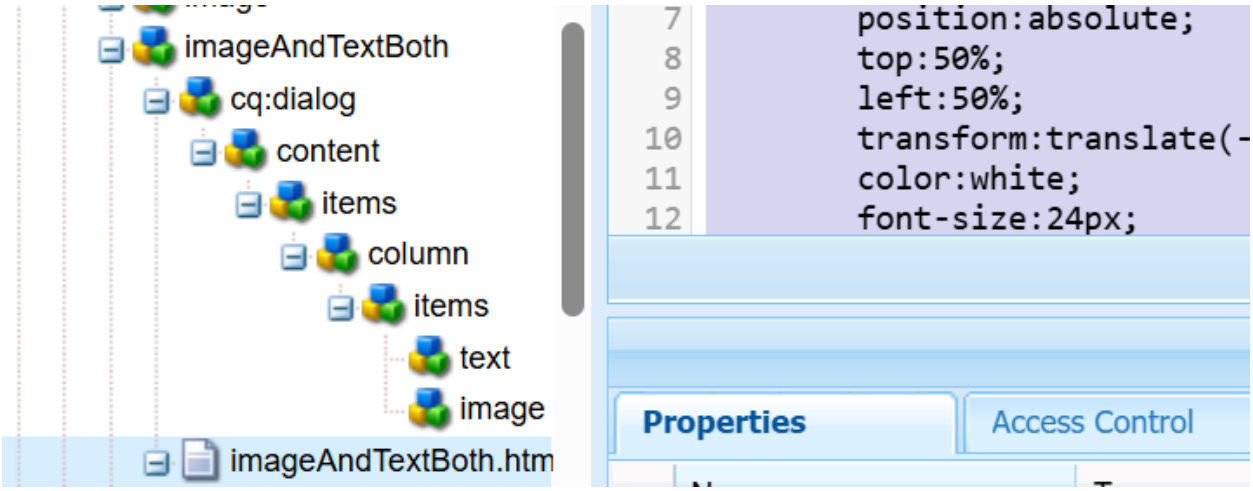


html code of the component with inline css

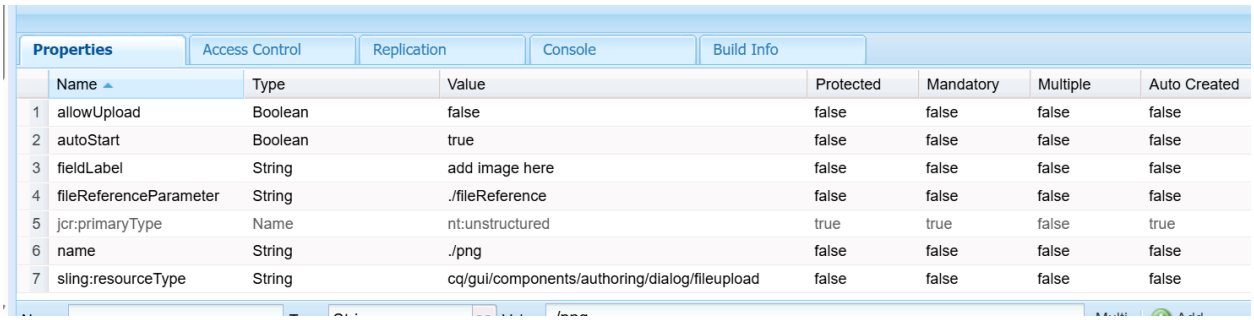
```
<div style="position:relative; width:100%;">
    <img
        src="${properties.fileReference}"
        alt="image"
        style="width:100%;"/>
    <div style="
        position:absolute;
        top:50%;
        left:50%;
        transform:translate(-50%, -50%);
        color:white;
        font-size:24px;
        font-weight:bold;
        text-shadow:2px 2px 4px black;">
        ${properties.text}
    </div>
</div>
```

```
<div style="position:relative; width:100%;">
  <img
    src="${properties.fileReference}"
    alt="image"
    style="width:100%;"/>
  <div style="
    position:absolute;
    top:50%;
    left:50%;
    transform:translate(-50%, -50%);
    color:white;
    font-size:24px;
    font-weight:bold;
    text-shadow:2px 2px 4px black;">
    ${properties.text}
  </div>
</div>
```

Structure of the component created



XML of the image



Properties | Access Control | Replication | Console | Build Info

	Name	Type	Value	Protected	Mandatory	Multiple	Auto Created
